STORIES

Website launch
Stone | 2019, October

I planned the entire restructuring of the company's institutional website given the debut of its new corporate identity. In its debut with a primetime advertisement the website in a few minutes had the same number of visits as in the last 6 months accumulated, without any flaws. It was my first project as a leader in the company.

New affiliation system

We created a new customer affiliation system in record time, given the company's new banking product. Developed in less than a month and focused on self-service, today it is the company's main prospecting platform for customers.

OTHER

Uber

2016, July – 2016, December
